(54) Title: SYSTEM AND METHOD FOR REGISTERING OF REFUSE COLLECTION

Fig 4

(57) Abstract: The invention shows a system (1) and a method for registering a collection of refuse from a refuse bin (19) to a refuse collection lorry (3). The refuse bin is provided with an information carrier (21) which is adapted to send information upon reception of an electromagnetic signal. An interrogator (9) and a registering unit (4) are provided on a holder (15), which is attachable to a person (23) who collects the refuse. The interrogator (9) is adapted to send an electromagnetic signal and to receive information from the information carrier (21). The registering unit (4) is connected to the interrogator (9) and is able to register information received from the interrogator (9).
